PowerUp EDU
SWIVl ™
Your partners in the classroom

Swivl offers a complete software platform designed to create a culture of support in schools among teachers and with their administrations. Easily share video, reflect on teaching, and engage in a practice of giving and receiving meaningful feedback. Combined with our patented robot for easy recording of any classroom or event, along with our multi-camera capabilities that allow for every student to be equally seen and heard, Swivl is an effective and sustainable program that you can easily implement into your schools for transformational results.

Classroom Observations
Create a holistic view of any classroom by recording both the teacher and the students.

Self-Reflection
Teachers record video to review and reflect on their own time.

Instructional Coaching
Using Swivl Cloud easily and effectively support your teachers with meaningful feedback.

Best Practice Libraries
Create a library of your school's exemplary lessons to share with new teachers.

Personalize Learning
Deeply know your student through recorded interactions that you missed and apply to lessons.

Sustainable

Effective

Easy

schools across the globe

"One of my teachers looked me in the eye and said: 'this is what I've been looking for my whole career.' When this 26- year veteran teacher received their Swivl they began coming into school on Saturdays to practice their craft."

- Dr. Joe Childs, Principal of Mitchell High School, SD

Teachers are able to create a holistic view of their classroom using multi-camera functions and multi-audio markers. Reflect on teaching practices, improve student interactions, and save your most important moments using live bookmarking. Swivl is also great for student projects, flipped classrooms, remote learning, and more!

Coaches are able you to easily and effectively interact with projects using the Swivl platform. Share, collaborate, give time-stamped feedback on videos, and create high impact conversations for teachers using comment playback.

Administrators are able to manage users, create groups of shared content, build best practice libraries, and monitor teacher progress. Engage and support. teachers on your own time.
