School Safety and Security

Avigilon provides a complete set of surveillance solutions that help you create a safe and secure environment and protect what is most valuable—your students, staff and faculty.

Real-time Notifications
Self-learning video analytics provide instant alerts of events on school grounds via desktop browser or mobile app, helping to improve response times in active situations.

Powerful Search
Avigilon Appearance Search™ technology sorts through hours of video with ease to quickly locate a specific person or vehicle of interest across an entire campus in real-time.

Ease of Use
User-friendly software is straightforward and intuitive, allowing staff to operate and manage the system, whether they are an IT novice or an expert.

Efficient Bandwidth Management
Avigilon High Definition Stream Management (HDSM)™ and HDSM SmartCodec™ technologies reduce bandwidth and storage needs while maintaining image quality.

Quick Action
ACM™ generated door events allow you to create rule-based actions and notifications for quick on-site responses, including immediate school-wide lockdown.

System Interoperability
ACM integrates with Avigilon Control Center™ software, allowing you to easily manage video alarm events with either system and display them through an intuitive interface.

Avigilon Solutions for Education

Avigilon Appearance Search Technology
A sophisticated AI search engine that helps you quickly identify a specific person and track their route throughout a site in real-time or during investigations.

H4 Video Intercom
Combines a 3 MP wide dynamic range, low-light camera, with a high-performance intercom featuring noise reduction and echo-canceling technologies.

Self-learning Video Analytics
Recognize and detect the movements of people and vehicles, notifying operators of events that may need further investigation.

Access Control Manager (ACM) System
Works together with ACC™ software to produce action-based alarms, and notifications so you can respond quickly to events.

H.264 Analog Video Encoders
Convert standard analog video feeds into digital streams—a cost-effective way to include legacy cameras in a network-based IP-system.
