### Next Generation of Interactive Floors

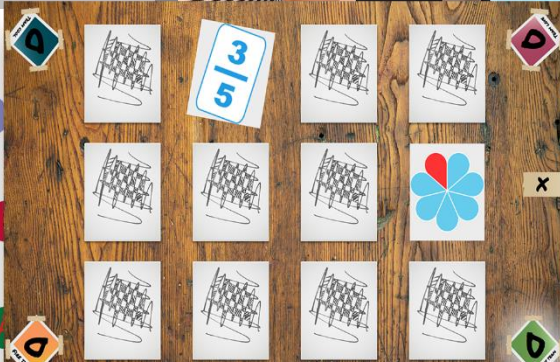

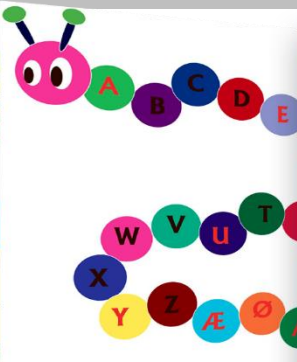

Play ~ Learn ~ Move

“Play” - Our Brain’s Favorite Way of Learning. ActiveFloor provides students the opportunity to learn in the way most natural for them.

Everybody Can Create Learning Games. Develop your own games or play one of the 1600+ available.

888.517.3824, ext. 1 | [sales@powerupedu.com](mailto:sales@powerupedu.com) | [www.PowerUpEDU.com](http://www.PowerUpEDU.com)

ActiveFloor turns any floor into an interactive play surface, powered by educational games and activities. Kids of all ages can learn and develop intellectually, physically, and socially by using the whole body.

With an interactive floor, students get an equal approach to auditive, visual and kinetic learning. With ActiveFloor's Online Platform, you have access to 1600+ games, or you can create your own.

The learning games with content for math, language arts and science provide teachers numerous opportunities to integrate movement and 'fun' in the teaching of both small and big kids.

Ideal for the Classroom, Media Center or STEM Lab.

The ActiveFloor PRO 2 Solution consists of a ceiling-mounted projector, a computer, a motion-detecting camera, an installation box and a vinyl floor. The PRO 2 solution has a bigger floor in terms of physical size and is the ideal solution for schools, libraries and for before- and after-school care facilities. (Ceiling height minimum: 9' 3" – Maximum: 11' 6")
